Professional Summary

Software Engineer with 2 years of hands-on experience designing cloud-native backend systems and distributed data processing solutions on Google Cloud Platform. Experienced in Kotlin, Spring Boot, Apache Beam, Dataflow, GraphQL, Docker, Apache Airflow, and CI/CD, with a proven track record of developing scalable enterprise applications and production-grade data pipelines at Equifax.

Work Experience

Equifax

Junior Software Engineer

Jul 2024 – Present

Thiruvananthapuram, India

- Designed, developed, and enhanced 10+ distributed Apache Beam pipelines on Google Cloud Dataflow, scaling data processing from 350K+ records in NPE to over 1 Billion+ records in Production.
- Developed and extended Kotlin-based RESTful APIs and GraphQL services using Spring Boot and Netflix DGS, delivering new business capabilities for enterprise microservices.
- Orchestrated multi-stage data processing workflows using Google Cloud Composer (Apache Airflow) to automate complex enterprise data pipelines.
- Built and maintained containerized microservices using Docker and Google Artifact Registry, supporting standardized deployments across environments.
- Enhanced CI/CD workflows using Jenkins, GitHub Actions, and Argo CD by modifying deployment pipelines and GitHub workflows for new services and features.
- Created operational dashboards in Data Studio to monitor transaction status and business metrics.
- Collaborated with cross-functional teams to design, implement, and deliver backend features while following Agile development practices.
- Co-developed a LangGraph-based RAG assistant that indexed Confluence documentation, reducing technical data retrieval times by 25% and accelerating onboarding for new team members.
- Helped build three internal platform agents using the Google ADK to automate release configuration updates and programmatically generate PRs, streamlining the team's deployment workflow.

Education

APJ Abdul Kalam Technological University

Bachelor of Technology in Computer Science (Marian Engineering College)

Jun 2024

CGPA: 9.23 / 10

Certifications

Google Cloud Certified: Associate Cloud Engineer (ACE)

Technical Skills

Languages: Kotlin, Java, Python, SQL, C++, JavaScript, PHP, HTML/CSS

Backend: Spring Boot, REST APIs, GraphQL (Netflix DGS), Microservices

Data Engineering: Apache Beam, Google Cloud Dataflow, Apache Airflow (Composer)

Cloud: Google Cloud Platform, Pub/Sub, BigQuery, Cloud Storage, Artifact Registry, Google Agent Platform, Data Studio

Databases: Google Cloud Spanner, Firestore

DevOps: Docker, Jenkins, GitHub Actions, Argo CD, Gradle, Git

AI: LangGraph, Google Agent Development Kit (ADK), Retrieval-Augmented Generation (RAG)

Academic Projects & Involvement

Motodealz | *Flutter, Mobile Development*

Apr 2024

- Built a cross-platform mobile application for peer-to-peer used vehicle trading, featuring ID and document verification layouts.

Construction Management System | *Bootstrap, PHP, JavaScript, HTML/CSS*

Jun 2023

- Collaborated in a 4-person team to implement a web application featuring secure manager/employee sessions and custom GUI layouts designed in Figma.

Campus Leadership & Engagement

2021 – 2024

- Served as Class Representative, Core Member at Computer Society of India (MEC), and Media Team Co-Lead at TinkerHub (MEC) to organize technical community events.
